Submission of manuscripts

Online: www.worldacademyofsciences.com
e-mail: submissions@worldacademyofsciences.com

By courier service/overnight mail: Professor D.A. Spandidos,
Editorial Office: 10 Vriaxidos Street, Athens 116 35, Greece

World Academy of Sciences (WAS)

The principle of WAS is to promote excellence. There are no obligations or fees. WAS has no political affiliations and does not discriminate on the basis of race, religion, age, sexual orientation, mental or physical disability in any of its activities or operations. Individual members can organize events to promote excellence on their own initiative under the auspices of WAS.

WAS consists of 4 classes as follows:

1st class: Sciences: Mathematics, Physics, Chemistry, Astronomy, Medicine.

2nd class: Humanities and Arts: Literature, Poetry, Music, Fine Arts, Archeology, History.

3rd class: Ethics and Political Sciences: Divinity, Philosophy, Law, Political and Economic Sciences.

4th class: Technological Sciences: Artificial Intelligence, Computers, Engineering.

World Academy of Sciences membership is composed of 3 member groups

- 1) Honorary (exceptional scientists)
- 2) Full (substantial achievements)
- 3) Associate

Publication data: The World Academy of Sciences Journal is published Bimonthly.

Copyright: Once the manuscript has been published the legal ownership of all published parts of the paper has passed from the Author(s) to the journal.

Subscriptions: OPEN ACCESS AND PRINT

Print and online subscriptions will be available at contact@worldacademyofsciences.com

Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the World Academy of Sciences Journal, provided that the base fee of US\$32.00 per copy, plus 0.40 per page is paid directly to Copyright Clearance Center, 27 Congress Street, Salem, MA 01970, USA. For those organizations that have been granted a photocopy licence by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is 1019-6439/93 US\$32.00 + 0.40.

The Editors and Publishers of The World Academy of Sciences Journal accept no responsibility for the opinions expressed by the contributors appearing herein.

PRINTED BY LYCHNIA IN ATHENS, GREECE
PRINTED ON ACID-FREE PAPER.

World Academy of Sciences Journal

Instructions to Authors

The principal aim of the *World Academy of Sciences Journal* (World Acad. Sci. J.) is to provide for the prompt publication of original works of high quality. Manuscripts will be accepted on the understanding that they report original unpublished works on the cancer problem and are not under consideration for publication by another journal. All material submitted to World Acad. Sci. J. will be subject to review by appropriate referees selected by the Editorial Office. The Editors reserve the right to improve manuscripts on grammar and style. The corresponding author is responsible on behalf of all authors for the submission.

Submission of manuscripts:

Online submissions: at www.worldacademyofsciences.com Submissions may be uploaded via our online submission system. To access the system, log in or create an account, and follow the onscreen directions. Text and tables should be included in one Microsoft Word (.doc file). Illustrations must be submitted as separate .tiff files, prepared as outlined below. Label the text file with the surname of the first author, and the illustration files as Fig. 1, Fig. 2, etc.

By courier service (overnight mail): Professor D.A. Spandidos, 10 Vriaxidos Street, Athens 116 35, Greece

Cover letter: Summarize briefly the main importance of the submitted work.

Format: Original work and review articles concerning fields of recognisable progress are accepted for evaluation. Manuscripts should be written in clear, concise English and should contain all essential data in order to make the presentation clear.

General style: Title of the work, sub-titles and general headlines should be presented in lower case letters (not capitals). Indicate the affiliations of the authors using numbers (not symbols). The abstract should be continuous (without reference numbers or headlines).

Manuscripts: Submitted manuscripts should include an abstract, text, figures and references. Manuscripts reporting experimental results should be divided into the following sections: (a) First page should include the title of the presented work, full names and full postal addresses of all authors, name and e-mail of the author to whom correspondence is to be sent, key words and an abbreviated running title; (b) Abstract of approximately 150-300 words; (c) Introduction; (d) Materials and methods; (e) Results; (f) Discussion; (g) Acknowledgements and (h) References. The pages should be numbered consecutively. Footnotes should not be used.

Reviews: Review articles may have different sections and headlines according to the subject matter and the author's opinion; however, an abstract is mandatory. The main headlines of the review should be summarized as a contents section immediately following the abstract.

Figures: Color figures are welcome; however, they should be submitted only if reproduction in color is intended (a charge will apply). Electronically submitted figures should be saved as .tiff files at a resolution of 300 dpi/in. Color figures should be set to CMYK mode. Figures should be clear, high contrast, and of the size they are to appear in the journal: 8.00 cm (3.15 in) wide for a single column; 17.00 cm (6.70 in) for a double column; maximum height 20.00 cm (7.87 in).

Graphs should not require any artwork or typesetting, and symbols, numbering and lettering should be clearly legible and of the appropriate size. The number and top of figures in print should be indicated.

Tables: Each table should be submitted on a separate page, and typed using double-spacing. Tables should be numbered with Roman numerals and should include a short title.

Nomenclature and Abbreviations: Nomenclature should follow that given in 'Chemical Abstracts'. Standard abbreviations are preferable. If a new abbreviation is used, it should be defined at its first usage.

References: Citation of journal titles follows the standard form of 'Index Medicus', and references must be numbered consecutively. Do NOT use a full stop after initials or abbreviations. In the text, references should be cited by the number in soft brackets, e.g., (1-3) (1,2). Inclusive page numbers should be given. A complete author list is preferred; however, if the reference includes more than 10 authors, 10 names and *et al* may be used. Following are examples of order and style, which should be strictly adhered to:

1. Spandidos DA and Paul J: Transfer of human globin genes to erythroleukaemic mouse cells. *EMBO J* 1: 15-20, 1982.
2. Spandidos DA and Wilkie NM: Expression of exogenous DNA in mammalian cells. In: *In vitro* Transcription and Translation - A Practical Approach. BD Hames and SJ Higgins (eds.) IRL Press, Oxford, pp1-48, 1984.
3. Spandidos A, Wang X, Wang H and Seed B: PrimerBank: a resource of human and mouse PCR primer pairs for gene expression detection and quantification. *Nucleic Acids Res* 38: D792-D799, 2010.

Personal communications should be avoided. Manuscripts in preparation or submitted, but not yet accepted, and abstracts, may be cited in the text; however, they should NOT be included in the list of references.

Conflicts of interest and informed consent: Forms are not used; however, the authors of all submitted manuscripts must declare whether they have any conflicts of interest. Additionally, all submitted manuscripts must include a statement that informed consent, if necessary, was obtained.

Use of humans and experimental animals: Research carried out on humans must follow international and national regulations. When experimental animals are used, research carried out must follow internationally recognised guidelines on animal welfare, as well as local and national regulations. Additionally, a statement must be included in the Materials and methods section of the manuscript, identifying the institutional and/or licensing committee that has approved the experiments undertaken.

Proofs: It is of vital importance that authors check their manuscripts carefully before submission, as any errors will be faithfully transferred into the typeset version.

Reprints and Page charges: A reprint order form will accompany the proofs and should be completed and returned immediately. Accepted manuscripts will be published on the understanding that the author(s) will pay the page charges as indicated on submission.
